About This Game

Monkey Island meets Over the Garden Wall, in a dark forest somewhere in Sweden.

In this cozy little point-and-click fairy-tale, you are a gnome on an abandoned farm. When you realize that humans have come to live there once more, you find yourself useful again - but also that you might have to work harder than ever to keep them safe from the dark creatures that lurk out in the forest. You might even have to call on some of the fair folks for help. Their aid, however, does not come without a price...

The game draws heavily from Swedish folk lore, with art inspired by artists such as John Bauer and Alvaro Tapia. It uses puzzles and riddles to tell its story, and there are several different ends to it. The player will also get to experience unique music and compelling voice over, as well as discover part of Sweden's history, since the game takes place in the 19th century - a time where over a million people left the country to avoid starvation and build a new life for themselves.

This game was created by one person over 6 months, plus a composer who made the wonderful music. It fits anyone who would like to experience an atmospheric and cozy fairy-tale, that might remind you of the stories you heard as a child.

Mom: You could have come home a bit earlier.

What was Ben doing all day?

I was busy.

This is probably the best bowling game on PC right now. It's the only one i've seen with realistic oil slicks, and physics.

I just wish it had more bowling alleys, and ball designs.. great game:

the role: be the chief of police ordering around your police officers,CSI investigators to get a nice healthy buget for more police officers. protected the districts enough.

not really found anything wrong at the moment with the game.it all seems to run prefectly just♥♥♥♥♥my police station HQ. :p. Computer teams cheat by making captures that are supposed to be impossible, like taking a spearman with a spearman. At least on expert and above difficulty. Haven't seen it happen on begineer.. Been using this with an XBOX360 wired controller for some time now, and it works absolutely flawlessly.

A lot of configuration options and smart design make this program great for controlling your desktop/browser/other programs with a controller.

Two thumbs up & a big thanks to the devs.. After playing just about an hour and a half before and after work, I can remark that Party of Sin is a largely enjoyable venture. It provides its antiheros (the seven deadly sins) with suitable interesting powers that work off each other well, it combines those in combat satisfyingly, and it breaks up the brawling with a few simple puzzles that apply the powers and skills of all the sins. The story is also pretty good, scrambling up elements of Christian dogma with a few new ideas to give everyone a sense of purpose.

It could definitely use polish. When the game's first boss is a lava narwhal, it's creative as hell but it feels like they're not recognizing how enjoyable the mythology and world building are for a game like this.

The controls, generally speaking, are tight, and I could see people having a lot of fun speed-running the crap out of this. They've already sort of set it up for exactly that, though blustering through isn't my style.

The one thing I wish is that we could rebind the keys. I never leave the jump key on space bar- I move it over to my mouse's side buttons as a holdover from the days I used a laptop to play Minecraft.

this app. for just listening music. and \$30.. 1st: This is a completely unfinished game.

However, I can't express how much love and care was given to everything from their perfect assets to the inexpressibly hilarious host - who rides the line of Monty python and skit-show comedy.

I love this game - and while not the best in the Stronghold series, perhaps the one that I would play the most.

. I just want to turn off the auto shot.

Like clicking the aims..... Not sure of this was a visual novel,ora dictatorial propaganda: minimal 'choices' that have no impact at all,a foregone conclusion which you can't alter in any way,aspects of the 'story' that lead to dead ends (the dad sob story,etc etc),and if you played through the previous titles like Swim Club,a major let down in every possible way.

GG I give it a Stalin/Communism. **THIS GAME IS CRAPPY**

that is all.... I enjoy the whole pack! Each map feels unique and the music gets more enjoyable the more I play.
